

Juraj Vysvader

🕒 Work experiences

- 22.3.2015 - now, programmatically helping clients around the world as a remote Python, PHP, SQL, Java, and JavaScript developer and (by a side-effect) consultant (offering a free customer support, consultation) at [Unisoftdev](#) (as a freelancer/contractor paid per results, done projects instead of a hourly rate per a spent time).

⚙️ Technical skills

🖥️ Windows and 🐧 Linux distros: CentOS, Ubuntu, Debian as well through >_ terminal - command prompt.
</> programming languages: Python, PHP, SQL, Java, JSON, JavaScript, Jquery, CSS, HTML, XML, and so on...

🗨️ Languages

English (fluently, TOEFL along other academic tests were prerequisites for my study on a US-based univerty), Slovak and Czech (fluently), German (basic)

🎓 Education

In a full-time work friendly manner, I'm currently studying science in computer science towards Bachelor's degree.

👍 Interests and hobbies

I enjoy the world wide web (back-end and front-end), automation (bots, AI, machine learning), networking, and the vast majority of subjects of computer science. Other way, I like to learn new things, meet new people, explore new cultures and systems and, anything scientific.

**A TALKATIVE COFFEEHOLIC
AND OPEN NETWORKER**

USED IN ~63K PROJECTS

In a pragmatic manner, [my CMS extensions](#) (plugins and themes) had been used by thousands of web developers in thousands of projects including paid projects (according to Google Analytics, the downloads usually happened in working hours/days of visitors' time zones).

They didn't know who I'm and didn't see my charismatic smile, these developers had only seen my code and that it worked... They came, saw, and took. Thanks all (tracked and well documented) thousands of web developers that credited me by using my code in their projects (for example, for someone like you).

OPEN SOURCE PROJECTS

Like the vast majority of programmers, sometimes, I've spent time on own, personal interests and, subsequently, a part thereof is published as unpaid open-source on GitHub. Here are my [GitHub](#) repositories. [UNISOFTDEV](#) 

Furthermore, I'm always keen to protect the privacy of my clients and cope with the law related to [data protection](#).

PRICE TABLE

SERVICE	TECH STACK	CYCLE	YEARLY SAVING	COMPETITIVE SUPPLY	MY PRICES, UNISOFTDEV
CUSTOMER SUPPORT - talking is for free (I don't charge for descriptions of and discussions about products)	Anything that you see offered from me	Variable	Let's talk about it and let's see	Plenty competitors: £Salaries	≥ £0, free of charge Talk to me
LINUX SYSTEM ADMINISTRATION (installations, networking)	Linux (Debian, Red Hat, Ubuntu, CentOS)	Variable	For one example, an installation of a faster (less CPU consuming) software enables to reduce physical infrastructure costs	Enough developers: £150 - £250/day	> from £49 (fixed per project, a product of work, not time) Mail me
AUTOMATION & PYTHON APPS	Python 3.x (and variables)	~5 years , upgradable	As an example can be an equivalent of a work worth £80000+ per 7 human powers	The insufficient supply of market demand lifts its market prices: £300 - £800/day	> from £99 (fixed per project, a product of work, not time) Mail me
A SMALL WEB APP (can work along with distant CMS or languages)	Python or Java, SQL, cache, front-end, etc	Variable	It can help to scale, save on hosting costs , possible automation	Not enough for all the demand of the market: £300 - £600/day	> from £49 (fixed per project, a product of work, not time) Mail me

SERVICE	TECH STACK	CYCLE	YEARLY SAVING	COMPETITIVE SUPPLY	MY PRICES, UNISOFTDEV
WEB DEV bulk pack (Python3 or Python3 + Rust libs)	Python 3.x (and variables like e.g. a cache, Django framework, Flask, Actix, some database, client side scripting, etc)	<u>~5 years</u> , upgradable	These apps scale, can save on hosting , possible automation , and later associated maintenance costs	The inadequate supply of demand top up prices: <u>£400 - £600/day</u>	> from £249 (fixed per project, a product of work, not time) Mail me
WEB DEV bulk pack - complete pack (PHP7 or PHP7 + Python3 or PHP7 + Rust)	PHP (or PHP+Python with libs or Rust libs), database, cache, server, client side scripting	<u>~2 years</u> , upgradable	?	An adequate supply: <u>£150 - £400/day</u> (For many of them, it takes them days , sometimes weeks)	> from £249 (fixed per project, a product of work, not time) Mail me
WORDPRESS DEV bulk pack - complete pack	PHP, WP CMS, SQL, cache, server, client side scripting	<u><1 year</u> then upgrades of WP core often <u>cause incompatibility</u> of plugins, theme (whoever you hire from), and a PHP version which powers the server	?	Plenty developers: <u>£110 - £300/day</u> (For many of them, it takes them days , sometimes weeks)	> from £249 (fixed per project, a product of work, not time) Mail me
Another PHP CMS? (Something that isn't listed)	PHP, some CMS, SQL, cache, server, client side scripting	Usually, it's <1 year, upgrades can cause incompatibility	?	Particularly undefined	Mail me
ANOTHER SERVICE (how can I help?)	?	?	?	?	Mail me
